

A38 Controladores

```
Route::get('/', 'HomeController@getHome');

Route::get('/catalog', 'CatalogController@getIndex');

Route::get('/catalog/show/{id}', 'CatalogController@getShow');

Route::get('/catalog/create', 'CatalogController@getCreate');

Route::get('/catalog/edit/{id}', 'CatalogController@getEdit');
```

Controlador Catalog

```
class CatalogController extends Controller
{
    public function getIndex(){

        return view('catalog/index');
    }

    public function getShow($id){

        return view('catalog/show', array('id'=>$id));
    }

    public function getCreate(){

        return view('catalog/create');
    }

    public function getEdit($id){

        return view('catalog/edit', array('id'=>$id));
    }
}
```

Controlador Home

```
namespace App\Http\Controllers;

use Illuminate\Http\Request;

class HomeController extends Controller
{
    public function getHome(){

        return view('home');
    }
}
```
